

# Ertifil Max 567 SG

## Non lauric fat for use in aerated fillings

Rev. date 13/11/2019

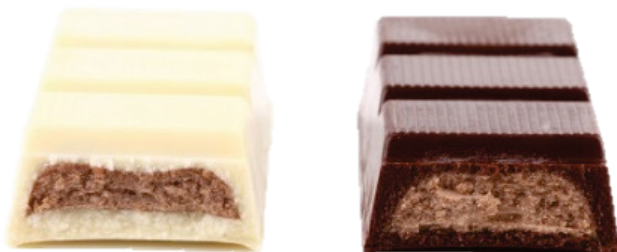

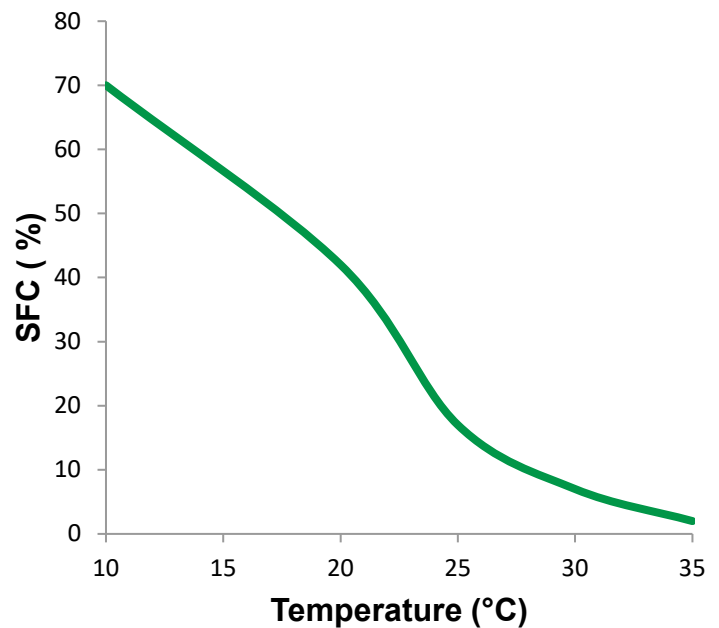

Ertifil Max 567 SG is a non lauric fat with excellent aerating properties.

- ✓ Non lauric
- ✓ 55% SAFA
- ✓ Non trans
- ✓ Non hydro

Depending of recipe and processing, a density as low as 0,65 kg/l can be obtained.

### Example

Recipe 72% chocolate  
28% Ertifil Max 567 SG

### Lab procedure aeration

- Heat mixture of Ertifil Max 567 SG and white chocolate to 50°C prior to aeration
- Cool mixture to 21°C under continuous stirring in a cold water bath
- Whip mixture for 1 min at full speed

Fillings with an overrun of 170% and a density of 0,65 kg/l are obtained.
