## Traceability & Transparency

We aim for 100% traceability to plantation globally by 2030.

Example: **UniFuji**, our highly sustainable plantation with mill, fractionation and refinery on the same site, enables excellent transparency, engagement and monitoring.

This way, we can ensure environmental compliance and identify/address risks of human rights violations.

### Our palm range

Coating fats & CBE

Filling fats

Spread fats

Biscuit & cream fats

Milk fat replacers

Fats for PBF

- RSPO Segregated
- Full compliance to NDPE
